

Name _____

The volume of your voice tells people things. It tells how you feel. It tells that you understand the rules of where you are. When you use the correct voice volume, people understand what you want, and how you are feeling.

Match the voice volume to the location where you should use that voice volume level. You will use the voice volume levels more than one time.

1 No talking
2 Whisper
3 Talking Voice
4 Loud talking
5 Screaming- Emergency!

Movie Theater

Lunch room

Hallway at school

Outside recess

Math class

Bathroom

Indoor recess

Church

Grocery Store

Dinner table

Name _____

When you use the correct voice volume, good things happen. The person who you are talking to can understand you, and they know you know the rules of talking in that place. There are different rules for talking in different places. It is really hard to know all the rules. It is important to practice good voice volume, no matter where you are. Good voice volume is knowing the correct level for where you are.

For each question, predict what will happen. Write your answers on the line.

1. You are at the library. You choose to talk to your friend about the truck book using a level 4 voice. What will happen?

2. You are in the lunch room. You choose to talk to your friend in a number 2 voice volume. What will happen?

3. You are in the hallway, walking to the bus at the end of the day. You choose to talk to your teacher using a number 4 voice volume. What will happen?

Name _____

When you use a voice volume that is not correct, people may tell you, or think things about what you are doing. It is important to know what the person may say or think when you do this. It will help you understand how to change your voice volume, so the next time you remember to use the right number voice.
